EDUCATION

International Institute of Information Technology, Naya Raipur

CGPA: 9.03

Bachelor of Technology in Computer Science

Nov. 2022 – May 2026

Delhi Public School, Raipur

92.6%

Senior Secondary School

2022

EXPERIENCE

Backend Intern: Fam (FamPay)  | *Django, Go, SQL, Kafka*

Feb 2025 – Aug 2025

- Migrated out SMS delivery from a Python monolith to a **Golang-based Kafka driven** notification microservice, **entirely removing database calls**.
- Developed a templating engine to manage notification templates and provider details, enabling faster and more flexible message delivery.
- Migrated out a high-traffic FCM token update API end point, from the python to go microservice which serves **800 requests/second**.
- Added support for reversing gold transactions in the Python monolith, helping solve support tickets.

Google Summer of Code 2025: CRIU  | *C, linux kernel*

May 2025 – Present

- CRIU (Checkpoint/Restore in Userspace) allows you to stop a running application, save its state to disk and restart it using that data. Working on adding support for files on lazily unmounted mountpoints to CRIU
- Extended the statmount syscall by adding support for file descriptors on MNT_DETACH flag mountpoint points.

Google Summer of Code 2024: CRIU  | *C, linux*

May 2024 – Aug 2024

- Worked on adding support for pidfd file descriptors in CRIU (Work Report )
- Improved CRIU's ZDTM test suite by differentiating between dump failures and dump crashes 

PROJECTS

bhshell  | *C, linux*

- Constructed a simple **shell** from scratch complete with **output redirection** to file (or stdout) and the ability to **pipe** to another command. Demonstrates proficiency in Linux processes.

Blog Aggregator  | *Go, postgres*

- Developed a **RestfulAPI** for an RSS Aggregator Application
- Supports User Creation/Deletion, Adding/Deleting Feeds, Fetch all of the latest posts from RSS feeds a user follows, user specific end points require authentication headers, Wrote a periodically running **scraper** that updates the news feed with new posts.

Wordy: A Wordle Solver  | *Python, Information Theory*

- Developed a 5, 6, 7 letter wordle  solver along with a **CLI** to use the solver, Solver can guess a 5 letter word **under 4 tries**, 6 and 7 letter words in 3 tries
- Used **Information Theory** and **entropy** to develop an algorithm for the next best guess

TECHNICAL SKILLS

Languages: C, Python, Go, SQL (SQLite, PostgreSQL), JavaScript

Technologies: Git, MakeFile, Linux, Kafka, Django, Protocol Buffers, Neovim (config )

Relevant Coursework: OS - I, OS - II, DBMS - I, DBMS - II, Data Structures, Design and Analysis of Algorithms, Data Communication, Computer Networks, Computer Organisation, Computer Architecture, Machine Learning, Software Engineering

Online Courses: CS50x , CS50 Python
